## **CENTURY TO EXPAND BATTERY RANGE FOR UPS MARKET**

CenturyYuasa has announced it will expand its exclusive range of high performance Century UPZ batteries to further strengthen its presence in Australia's Uninterruptible Power Supply (UPS) market.

Two new batteries are to be introduced – the UPZ 370W-12 and UPZ 300W-12 - both specifically designed for UPS applications. The batteries, due to be released in time for the new year, will complement the existing Century UPZ range which consists primarily of batteries for standby applications.

The introduction of UPS-specific batteries into Century's product range is designed to further enhance its brand presence in industrial markets in Australia.
